JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Adsorbed hydrogen
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces 13
Adsorption
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol 165
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction 47
Alcohols
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol 165
Alkanethiol
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes 171
Amino acid residue model
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex 109
Anionic clays
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability 27

Bioelectrocatalysis
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics 211
Bismuth
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol 165

Carbon steel
The electrochemical behavior and impedance characteristics of the passive film on carbon steel in nitric acid solutions 95
Charge hopping
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex 109
Charge transport
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex 109
Chemically modified electrodes
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability 27
Cold fusion
A numerical approach to the voltammograms of a thick plate Pd|H electrode 55
Composite microelectrode
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces 13
Composites
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution 39
Conductivities
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) 125
Constant-current chronopotentiometry
Voltammetric modelling via extended semiintegrals 179
CO_2 reduction
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction 47
Corrosion
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution 117
Coupling of electrochemical oscillations
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system 105
Current oscillations
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system 105
Cyclam
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction 47
Cyclic voltammetry
A numerical approach to the voltammograms of a thick plate Pd|H electrode 55
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. : Part III. Glycine on Pt(100) and Pt(110) 155
Electrostatic interactions at self assembled molecular films of charged thiols on gold 17
Voltammetric modelling via extended semiintegrals 179
Cytochrome b_5
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants 197

Diaphorase
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics 211
2D ordering
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers 7

Electrocatalysis
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction 47
Electrochemical behaviour
Osmium complexes bearing functional groups: building blocks for integrated chemical systems 89
Electrochemical impedance spectroscopy
Electrostatic interactions at self assembled molecular films of charged thiols on gold 17

PII S0022-0728(98)00092-8

Electronic spectra
Osmium complexes bearing functional groups: building blocks for integrated chemical systems 89
Electron transfer
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer 71
Electropolymerisation
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) 125
Electropolymerization
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution 117
Electroreflectance spectroscopy
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes 171
Electrorheology
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions 1

$Fe(CN)_6^{4-}$ oxidation
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system 105
$Fe(CN)_6^{3-}$ reduction
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system 105
Ferrocene
Electrostatic interactions at self assembled molecular films of charged thiols on gold 17
FTIR spectroscopy
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. : Part III. Glycine on Pt(100) and Pt(110) 155

Glycine
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. : Part III. Glycine on Pt(100) and Pt(110) 155
Gold electrodes
Electrostatic interactions at self assembled molecular films of charged thiols on gold 17
Gold single crystal
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers 7

H-adatoms
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions 135
Hybrid materials
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution 39
Hydrogen evolution
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions 135
Hydrotalcites
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability 27
Hypericin
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes 171

Impedances
The electrochemical behavior and impedance characteristics of the passive film on carbon steel in nitric acid solutions 95
Inhibition
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution 117
Integrated chemical systems
Osmium complexes bearing functional groups: building blocks for integrated chemical systems 89
Interfacial potential distribution
The effect of the interfacial potential distribution on the reduction of adsorbed methylene blue at a mercury electrode 63
Ionic conductivity
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution 39
Ions
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol 165
Iron
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution 117

Kinetics
A numerical approach to the voltammograms of a thick plate Pd|H electrode 55

Lead
Stripping chronopotentiometry of immobilized microparticles 81

Membrane model
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer 71
Mercury electrode
The effect of the interfacial potential distribution on the reduction of adsorbed methylene blue at a mercury electrode 63
Methanol
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol 165
Methylene blue
The effect of the interfacial potential distribution on the reduction of adsorbed methylene blue at a mercury electrode 63
Microparticles
Stripping chronopotentiometry of immobilized microparticles 81
Mild steel
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution 117

NAD-dependent enzyme
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics 211
Nafion®
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution 39
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex 109
Nernst diffusion layer
Voltammetric modelling via extended semiintegrals 179
Ni(II) complexes
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction 47
Nitric acid
The electrochemical behavior and impedance characteristics of the passive film on carbon steel in nitric acid solutions 95

N-methyl substitution
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction 47

Non-linear phenomena
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system 105

Osmium complexes
Osmium complexes bearing functional groups: building blocks for integrated chemical systems 89
Oxidised state
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) 125

Pd|H system
A numerical approach to the voltammograms of a thick plate Pd|H electrode 55
Pd|H electrode
A numerical approach to the voltammograms of a thick plate Pd|H electrode 55
Phase transition
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers 7
Phospholipid monolayer
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer 71
Photoeffects
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions 1
Photoelectrophoresis
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions 1
Photo-induced electron transfer
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes 171
Platinum electrodes
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions 135
Polarization model
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions 1
Polyaniline
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution 117
Poly(2,5-di-(-2-thienyl)-furan)
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) 125
Potential oscillations
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system 105
Potential-step chronoamperospectrometry (PSCAS)
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex 109
Potentiometry
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics 211
Protein structure
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants 197
Pt(100) electrode
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. : Part III. Glycine on Pt(100) and Pt(110) 155
Pt(110) electrode
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. : Part III. Glycine on Pt(100) and Pt(110) 155

Reduced state
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) 125
Reduction potential
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants 197
Reversibility
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics 211
$Ru(bpy)_3^{2+}$
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex 109

Self assembled monolayer
Electrostatic interactions at self assembled molecular films of charged thiols on gold 17
Semiintegrals
Voltammetric modelling via extended semiintegrals 179
Single crystal
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol 165
Solid polymer electrolyte
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces 13
Solubilities
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) 125
Spectroelectrochemistry
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants 197
Spillover
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces 13
Stripping chronopotentiometry
Stripping chronopotentiometry of immobilized microparticles 81
Surface diffusion
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces 13

Thiols
Electrostatic interactions at self assembled molecular films of charged thiols on gold 17
Third H-adatom current peak
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions 135
Tin
Stripping chronopotentiometry of immobilized microparticles 81
TiO_2
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions 1

Uracil
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers 7
Uridine
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers 7

Vitamin K
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer 71
Voltammetric modelling
Voltammetric modelling via extended semiintegrals 179

Water effect
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions 1
